Dallas County, Texas and AmCad announce the successful implementation of AmCad's *integrated Land Information System*

Dallas, July 22, 2009– American Cadastre LLC (DBA AmCad), a Herndon, Virginia-based Company, and the Clerk's office of Dallas County (the 7th largest county in the United States) announce the successful implementation of the AmCad *integrated Land Information System* (AiLIS)

AmCad and Dallas County embarked on a rapid implementation schedule of 10 weeks from contract signing to go live. During Day 1 of the Go Live the Clerk processed 1,345 recordings in the AiLIS application, including 65 Marriage Filings and 264 Electronic recordings (eRecording), which increased to over 2,000 documents utilizing the new application on Day 2. AmCad's AiLIS system integrates the cashiering, finance, scanning, auto-redaction, electronic recording and third-party indexing to improve the office's business process and enhance the efficiency of the office.

"I am excited about the new partnership with AmCad. My goal has been to make Dallas County the role model for other counties in providing best in class service to our constituents," stated Dallas County Clerk John Warren. "What AmCad and I have done has never been done before in Dallas County. Because of the commitment from both our teams, Dallas County is on its way to becoming the flagship in the State of Texas."

The new system is installed, operational and continues the vision of the Clerk to automate his offices with technology to better serve the citizens of Dallas County. The system will drastically reduce the dependence on moving paper, with the eRecording module, and the implementation of the imaging system to track and process all documents electronically.

"AmCad is excited about the successful implementation of the AiLIS system in the Dallas County Clerk's office," said Visagar Shyamsundar, AmCad's Chief Operating Officer. "AmCad delivered the Clerk's vision of utilizing technology in a rapid delivery that should be a model for automation projects going forward for other government

agencies. We are pleased to partner with the Clerk in improving the services the Clerk provides the citizens of Dallas County,” he said.

AmCad has been providing solutions and services to governments for more than two decades. AmCad is dedicated to automating records for government and businesses. AmCad provides an array of solutions and services for government offices for automating Land Records, Court Records, Vital Records and Enterprise Content Management systems and converting records to on-line systems.
